

**Ileana Fălcescu**  
**Head of Department**  
**Water Management Resources**  
**Ramboll**

---

Ileana Fălcescu is involved in the implementation of water infrastructure projects in Romania, within Ramboll since 2014, both as an expert and responsible for coordinating multidisciplinary teams, dedicated to the management of water resources.

The preparation and implementation of projects with European funding in the field of environment is a solid expertise that has been started since 2005 through the Managing Authority organized at the level of the Romanian Ministry of Environment. The entire activity was dedicated to environmental projects and studies and continuous adaptation to sustainable development, climate change, circular economy.

She is a graduate of Environmental Sciences at the University of Bucharest and holds a master's degree in Reioana Development and Changes in Environment.
