

Jacek Zalewski is Vice President at RetencjaPL, where he leads the international development of the WaterFolder.com platform for designers and oversees the company's design office and consultancy team. With nearly 25 years of experience in international water management, he supports projects across the full lifecycle — from feasibility studies and pre-design analyses, through design and investment organization, to implementation and final evaluation.

An international expert in water management and stormwater, Jacek provides institutional and technical support to local and national authorities and water utilities, integrating technical, economic, social, environmental and urban-planning perspectives to create resident-friendly, sponge cities. His passion for river restoration and green-blue infrastructure (SUDs), combined with practical technical expertise, delivers solutions that are both innovative and implementable.

Experienced trainer, presenter and author of articles and books as well as brochures promoting green and blue infrastructure.
